# LABOR MARKET DIGEST

October Data

December 2007

## Multiple Job Holders

**M**ultiple job holders include wage or salary workers who hold two or more jobs, self-employed workers who also hold a wage or salary job, and unpaid family workers who also hold a wage or salary job. Excluded are self-employed persons with multiple businesses and persons with multiple jobs as unpaid family workers.

According to the Current Population Survey (CPS), the national multiple job holding rate moved from 6.0 percent for 1994 to 5.2 percent for 2006. Between 1994 and 2006, the national rate has slowly and consistently declined.

The Maine multiple job holding rate moved from 6.5 percent for 1994 to 8.2 percent for 2006. The Maine rate, while rising and falling, has remained consistently above the national rate. Within New England, New Hampshire and Vermont have

also consistently exceeded the national rate.

The reasons for taking an additional job are many and varied. Some do so because they enjoy the work or want to pursue other economic activities. Others seek a second job because they are unable to work enough hours or earn enough money in their primary jobs to support themselves or their families. For May 1997, over 40 percent of multiple job holders in the U.S.

held two or more jobs to meet regular household expenses or to pay off debt; similar numbers were recorded for May 1991. The U.S. Bureau of Labor Statistics (BLS) last published data from the Current Population Survey concerning reasons for working more than one job for May 2001 (see related graph on page 8). At that time about 28 percent of the multiple job holders in the U.S. traded in non-work time for an additional job to meet expenses or pay off debt. However, according to BLS, it is difficult to tell how much of the change between 1997 and 2001 was due to changes in question design.

<sup>1</sup> Civilian labor force, employed, and unemployed estimates are by place of residence. Current year estimates are preliminary; year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces.

<sup>2</sup> Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

<sup>3</sup> People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following criteria: 1) they were not employed during the survey week; 2) they were available for work at that time; and 3) they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

<sup>4</sup> The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force and is expressed as a percent.

<sup>5</sup> Bangor; Lewiston-Auburn; Portland-South Portland-Biddeford; Portsmouth, NH-ME; and Rochester-Dover, NH-ME are Metropolitan Statistical Areas. Augusta, Brunswick, Rockland, Sanford, and Waterville are Micropolitan Statistical Areas.

<sup>6</sup> Adjacent metropolitan and/or micropolitan statistical areas that have a specific level of economic integration, but still retain separate identities.

<sup>7</sup> Maine portion of the area which includes towns in both Maine and New Hampshire.

### Area Analyst's Corner

#### Central Maine Merrill Huhtala (207) 621-5196

**Athenahealth, Inc.**, will purchase part of the former MBNA headquarters in Belfast, and hire up to 100 workers early in 2008. Eventually the company may bring 600 jobs to Maine. Athenahealth is headquartered in Watertown, MA., and is a provider of internet-based services for physician practices. Boston Business Journal recognized Athenahealth as one of their Best Places to Work in Massachusetts in 2007. ♦ In Augusta, construction is nearing completion at Augusta Crossing, with **Lowe's Home Improvement**, **Best Buy**, **PetSmart**, and **Staples** staffed and open for business. ♦ The City of Waterville issued a building permit allowing renovations to begin at the former **Hathaway** shirt factory.

#### Western Maine Gerard Dennison (207) 753-9045

A **Comfort Inn** is being built on Route 2 in Wilton. The \$6 million hotel will include 88 guest rooms, meeting spaces, a fitness center, swimming pool, and guest laundry. Plans are to open it in June 2008 with 19 to 25 new jobs. ♦ A \$6.5 million wood-pellet mill is planned for the former **Forster Manufacturing** plant in Strong, producing fuel to heat schools and other public buildings. Thirty full-time people will be employed when it opens in May 2008. The mill will run three shifts and use approximately 150,000 tons of hardwood per year. ♦ **FedEx**, one of the world's premier package delivery and business services companies, is expanding their presence in Lewiston with a brand new facility at 380 River Road.

#### North/East Maine Craig Holland (207) 941-3076

The **Cianbro Corp.** new **Eastern Manufacturing Facility** is taking shape. Beginning in April, Cianbro expects to employ at least 500 people at the site. ♦ A Canadian global market research firm, **Acrobat Research** plans to open its first U.S.-based outlet in Calais. They expect to begin operation in January and eventually employ more than 80 full-time and 130 part-time people. The company provides outsourced, outbound, and inbound market research data-collection services. ♦ **Stewart Response Group**, which operates a virtual call center in southern Aroostook County, is looking to expand. The company firm recruits, contracts, and certifies sales agents who work from home. The company now has 75 agents scattered throughout southern Aroostook.

#### Southern Maine Gerard Dennison (207) 753-9045

**Planet Dog**, based in Portland, has moved production of its molded plastics products from the Dominican Republic to Springvale. The company also has plans to move its sewn products from China to domestic manufacturers by 2010. The move has saved over 20 jobs for G & G Products of Springvale. ♦ The **Atlantic Development Company** has cancelled plans to develop the focal point of the city's Bayside redevelopment. ♦ The **Broadway Business Park** will occupy the space where Newick's Restaurant once was in South Portland. Plans include a health store, a beauty salon, a coffee shop, and a restaurant.

## Maine Unemployment Rate 4.8 Percent in October

State Labor Commissioner Laura Fortman announced that the preliminary seasonally-adjusted October unemployment rate for Maine was 4.8 percent, unchanged from 4.8 percent for September and up slightly from 4.7 percent for October 2006. The national unemployment rate for October was 4.7 percent.

“Labor market conditions have changed little recently,” said Commissioner Fortman. “The unemployment rate has remained at 4.8 percent since July.”

The total number of seasonally-adjusted nonfarm wage and salary jobs fell by 1,200 between September and October due to a decline of 1,200 government jobs. Government jobs returned to mid-summer levels after a temporary increase this fall due to the seasonal adjustment process inadequately capturing the volatility of school hiring.

Between October 2006 and October 2007, the total number of seasonally-adjusted nonfarm wage and salary jobs increased by 3,900. Over-the-year, the largest job gains were recorded in health care and social assistance; professional and business services; trade, transportation, and utilities; leisure and hospitality services, and other services. Job losses were registered in manufacturing, construction, and financial activities.

Other New England states reporting a seasonally-adjusted unemployment rate for October include New Hampshire, 3.2 percent; Massachusetts, 4.3 percent; Connecticut, 4.7 percent; and Rhode Island, 4.9 percent. The adjusted national rate for October was 4.7 percent, unchanged from 4.7 percent for September and up from 4.4 percent for October 2006.

The not-seasonally-adjusted Maine unemployment rate for October was 4.4 percent, up from 4.1 percent for September and 4.1 percent for October 2006. The unadjusted national rate was 4.4 percent for October, down from 4.5 percent for September and up from 4.1 percent for October 2006. Not-seasonally-adjusted October unemployment rates for Maine counties ranged from 3.6 percent for Cumberland County to 6.7 percent for Piscataquis County (see graph).

Not-seasonally-adjusted nonfarm wage and salary jobs in Maine declined by 3,400 between September and October. The largest job loss was recorded by leisure and hospitality services as the tourist season wound down from its summer peak. Seasonal gains in local government education and private educational services partially offset job losses.

## Selected Regular Unemployment Compensation Program Indicators

Key Data	Oct 2007	Sep 2007	Oct 2006

<sup>1</sup> Hours worked and earnings data are computed based on payroll figures for the week including the 12th of the month for manufacturing production workers. Average hourly earnings are calculated on a gross basis, and include such factors as premium pay for overtime and shift differential, as well as changes in basic hourly and incentive rates of pay. Average weekly earnings are the product of weekly hours worked and hourly earnings.

Footnotes: From page 6.

<sup>1</sup> Nonfarm wage and salary employment estimates include all full- and part-time wage and salary workers who worked during or received pay for the pay period which includes the 12th of the month. Domestic workers in private households, proprietors, the self-employed, and unpaid family workers are excluded. Estimates measure the number of jobs by industry. Current month's estimates are preliminary; prior month and year-ago estimates are revised. These estimates are benchmarked to March 2006. As a measure of reliability, the March 2006 benchmark revision for total nonfarm wage and salary employment was 0.4 percent higher than the original sample-based estimate.

<sup>2</sup> Regular teachers are included in summer months whether or not specifically paid in those months.

\* Where an employment estimate is not entered, either the data is not available in sufficient detail for publication or is nondisclosable by law.

Source: See page 2.

cont. from page 1

Nearly 30% of the multiple job holders in the U.S. had more than one job to meet expenses or pay off debt in May 2001

Beyond the national reasons cited for multiple job holding, there may be additional explanations for Maine's multiple job holding rate.

Studies indicate that high multiple job holding rates are tied in part to higher-than-average levels of part-time workers and a relatively high incidence of agricultural employment and the need for workers in that industry to supplement their incomes. The percent of employment accounted for by workers whose primary job is part-time or part-year is higher in Maine than in the U.S. according to the American Community Survey. The higher level of part-time or part-year workers is likely due to: (1) the high degree of seasonality of employment in Maine and (2) the growth and current high

employment levels of retail trade and many services industries in Maine, where part-time jobs are more prevalent. Agricultural employment in Maine also accounted for a higher percentage of resident employment in 2006 (Maine, 2.7 percent; U.S., 1.6 percent).

Another possible contributor to the high multiple job holding rate in Maine is the level of self employment. In Maine, 9.4 percent of the employed residents said they were self employed compared to a national rate of 7.4 percent for 2006. Many Maine residents whose primary job is self-employment likely have a wage and salary job to supplement their income.

Why do people in Maine hold more than one job at a higher rate than the national average? Is it the need for income, the availability of jobs, or some other reason? There is a lack of information to directly determine that in Maine. Although it is possible that the rate at which workers hold more than one job to meet expenses or pay off debt in Maine exceeds the national rate due in part to the industrial structure and resultant relatively low average wages of Maine workers, the data is not available to definitively determine the financial and nonfinancial reasons for working more than one job.
